About the workshop:

Consumer electronics are electronic equipment intended for daily use everywhere. These are used for entertainment, communications or information, recreation and comfort. such as TV, Mobile, Refrigerator, washing machine, Air conditioner etc. Covering both fundamental and advanced topics the workshop will blend theoretical knowledge with practical exercises. Participants will learn about the major electronics housekeeping items. Through interactive sessions and expert guidance, participants will gain the skills needed to enhance their research projects and achieve academic excellence.

Objective of the workshop:

The objective of this workshop is to provide participants with a solid foundation for fault diagnosis and circuit analysis essential for conducting their future projects in this field. Apart from Following major topics are to be covered:

1. Washing Machine
2. Inverters
3. RO
4. Sensor
5. Solar system design
6. basics of Antenna
