The Principal Secretary to Governor

Governor's Secretariat, Bihar

Patna

Ref: Memo no. BSU (UGC) 02/2023-1457 GS (I) Dated-14.09.2023

Sir,

With reference to your letter Memo no.- BSU (UGC) 02/2023-1457 GS (I) Dated-14.09.2023, we are herewith submitting one set of prepared syllabus for 4 year undergraduate courses (Bachelor of Arts-Economics) based on CBCS to you for your perusal and consideration.

Following members were authorized by your above reference letter.

With kind regards,

Prof. (Dr.) Dhirendra Kumar Singh Professor, PG Deptt. of Economics, VKSU, Ara

19 9 22 4

**Dr. Siddharth Bhardwaj,** Assistant Professor, Deptt of Economics Patna College, Patna University,Patna

19.09.2023

Dr. Sourav Kumar, Assistant Professor, University Deptt. of Economics, Magadh University, Bodh Gaya

**Prof. (Dr.) B. K. Lal** University Deptt. of Economics, Patna University, Patna

Dr. Manoj Prabhakar, Assistant Professor, University Deptt. of Economics, Patna University, Patna

19.9.23

Prof. (Dr.) Rajeshwar Prasad Shrivastava, PG Deptt. of Economics, J.P. University, Chhapra

Prof. (Dr.) Rashmi Akhoury, Deptt. of Economics, COCAS, PPU, Patna

Prof. (Dr.) Nisha Kumari, PG Deptt. of Economics, TMBU, Bhagalpur

Prof. (Dr.) Ranjana Singh, RD & DJ College, Munger University, Munger

**Prof. (Dr.) Umesh Prasad**, Professor, Deptt. of Economics, COCAS, PPU, Patna

**Dr. Yadawendra Singh,** Assistant Professor, C.M. College, L.N. Mithila University, Darbhanga

**Dr. Shahid Hussain**, Associate Professor, PG Deptt. of Economics, BNMU, Madhepura

(Dr.) Alok Pratap 17/9/23

Singh, Deptt. of Economics, RDS College, Muzaffarpur

## Semester III **MJC-3: INTRODUCTORY MACROECONOMICS** (Credit: 5)

### **Course Outcomes**

After the completion of the course, the student will be able to:

- Develop a proper and in- depth understanding of variables dealing with the aggregate economy. CO1:
- Analyse the basics of National Income Accounting, which will help them to describe and analyze the CO2: economy in quantitative terms.
- Understand the major issues and concerns of the economy such as unemployment, inflation, CO3: poverty and economic growth.

Describe Functions of Money and Determination of Money Supply and Demand CO4:

| Unit | Topics to be covered   | No. of Lectures |
|------|--|-----------------|
| 1    | Introduction to Macroeconomics and National Income Accounting<br>The Origin and Roots of Macroeconomics, Need and relevance of Macroeconomics, Scope<br>of the Subject, Macroeconomic concerns and issues the Role of Government in<br>Macroeconomics the components of Macroeconomics and issues the Role of Government in<br>Circular flow of Income, The Concepts of National income: GDP, GNP, NNP, NNP at<br>factor cost, Personal income, private income and personal disposable income, approaches to<br>calculating GDP, Nominal and real GDP, Green GDP, concept of social accounting,<br>limitations of GDP as a measure of social welfare, difficulties in measuring national<br>income in developing economies, GDP and black economy, concept of base year and GDP<br>index |                 |
| 2    | Money and Banking<br>Functions of money; quantity theory of money; fundamental equations; Keynesian theory<br>of money and prices, determination of money supply and demand; Centralbanking:<br>history, objectives, functions, relevance, performance, tools of monetary policy; Concept<br>and history of commercial banking - functions, distribution of assets and credit creation.  | 20              |
| 3    | The Closed Economy in the Short Run<br>Classical and Keynesian systems; simple classical system of output and employment,<br>Keynesian model of income determination, Aggregate supply and demand, fiscal and<br>monetary multipliers, limitation and Relevance of Keynesian economics to developing<br>economy  | 20              |
|      | TOTAL  | 60              |

Suggested Readings:

Dornbusch, Fischer and Startz, Macroeconomics, McGraw Hill, 11th edition, 2010.

N. Gregory Mankiw. Macroeconomics, Worth Publishers, 7th edition, 2010.

Olivier Blanchard, *Macroeconomics*, Pearson Education, Inc., 5<sup>th</sup> edition, 2009. Richard T. Froyen, *Macroeconomics*, Pearson Education Asia, 2<sup>nd</sup> edition, 2005.

Andrew B. Abel and Ben S. Bernanke, Macroeconomics, Pearson Education, Inc., 7th edition, 2011.

1 Page 19.09 2023 19-09-23

# **SEMESTER - III MJC- 4: STATISTICAL METHODS IN ECONOMICS** (Credit: 4)

## Course Outcomes

After the completion of the course, the student will be able to:

Learn the Basic Concepts of statistics and its application CO1:

- Understand Bayes Theorem, Normal Distribution, Poisson Distribution CO2:
- Understand Elementary Probability Theory including Probability Distribution CO3:
- Apply the methods of calculating covariance and also the concept of correlation coefficient and CO4: regression analysis

| Unit | Topics to be covered   | No. of Lectures |
|------|--|-----------------|
| 1    | <b>Basic Statistics</b><br>Measures of Central Tendency: Mean, Median Mode, Geometric Mean,<br>Harmonic Mean; Measures of Dispersion: Mean Deviation, Quartile Deviation,<br>Standard Deviation; Moments, Skewness, Kurtosis, Gini coefficient, Lorenz<br>Curve, Bivariate Frequency Distribution: Simple Correlation and Linear<br>Regression Analysis    | 20              |
| 2    | Index Number<br>Concept of Index Number, Laspeyre's Paasche's and Fisher's Ideal Index<br>Number, Tests for Ideal Index Number, Problems in Construction of Index<br>Number, Applications: Cost of living index Number   | 10              |
| 3    | <b>Concept of Probability and Probability Distribution: Sample space and</b><br><b>events;</b> probability axioms and properties; Concept of random variable,<br>Addition and Multiplication Theorem, Conditional Probability and Bayes<br>Theorem Probability Distributions: Binomial, Poisson and Normal Distribution-<br>properties, mean and variance. | 15              |
| 4    | Sampling Theory and Estimation<br>Concept of Sampling, Methods of Sampling, Types of Sampling, Concept and<br>properties of an estimator, Point and Interval Estimation.   | 5               |
|      | TOTAL  | 50              |

Suggested Readings:

Jay L. Devore, Probability and Statistics for Engineers, Cengage Learning, 2010.

John E. Freund, Mathematical Statistics, Prentice Hall, 1992.

Gupta S.P, Statistical Methods, S.Chand & Sons, New Delhi.

Richard J. Larsen and Morris L. Marx, An Introduction to Mathematical Statistics and itsApplications, Prentice Hall, 2011.

Richard J. Larsen and Morris L. Marx, An Introduction to Mathematical Statistics and itsApplications, Prentice Hall, 2011.

# **SEMESTER-IV MJC- 5: INTERMEDIATE MICROECONOMICS 1** (Credit: 5)

## Course Outcomes

After the completion of the course, the student will be able to:

- Frame their budget according to their income and price constraint. CO1:
- Develop knowledge about how the prices are determined in different forms of market. CO2:
- Apply Demand and Supply Analysis to Market. CO3:
- Deal with the concept of Consumer Behavior. CO4:

| Unit | Topics to be covered  | No. of Lectures |
|------|---|-----------------|
| 1    | Ordinal Utility Analysis:<br>Concept, Assumptions, Tools: Indifference curve and Budget line, income<br>effect, substitution effect and price effect for normal and inferior goods,<br>Slutsky equation and Hicksian Substitution effect;<br>Revealed preference theory, deriving demand theorem from the Revealed<br>Preference Hypothesis and critical appraisal of Revealed Preference<br>Hypothesis.<br>Revision of Demand Theory: weak and strong ordering,<br>Recent development in Demand Theory.  | 20              |
| 2    | <ul> <li>Production, Costs and Revenue Analysis</li> <li>Production with one and more variable inputs; law of variable proportion, returns to scale, optimum factor combination, Production possibility curve, elasticity of substitution</li> <li>Traditional and Modern approaches to cost</li> <li>Behaviour of Cost and Revenue curves under different market conditions, Internal and external economies and diseconomies of scale,</li> <li>Concept, assumptions, characteristics and types of Production function with examples, estimation and their applications: Homogeneous, Linear</li> </ul> | 20              |
|      | Homogenous and Cobb-Douglas Production Function, Production function<br>and technological change.   | *               |
| 3    | Perfect Competition and Monopoly<br>Review of perfect competition: features, price and output determination under<br>perfect competition in short and long run, total and marginal approach.<br>Monopoly: features, conditions for existence of monopoly, price and output<br>determination under monopoly, measurement of the degree of monopoly<br>power, pricing with market power; price discrimination; government policies<br>towards monopoly and competition  | 20              |
|      | TOTAL   | 60              |

## Suggested Readings:

Hal R. Varian, Intermediate Microeconomics, a Modern Approach, W.W. Norton and Company/Affiliated East-West Press (India), 8<sup>th</sup> edition, 2010. The workbook by Varian and Bergstrom may be used for problems. C. Snyder and W. Nicholson, Fundamentals of Microeconomics, Cengage Learning (India), 2010.

B. Douglas Bernheim and Michael D. Whinston, Microeconomics, Tata McGraw-Hill (India), 2009

## **SEMESTER - IV MJC-6: INTERMEDIATE MACROECONOMICS** (Credit - 5)

### Course Outcomes

After the completion of the course, the student will be able to:

Develop a proper and in-depth understanding of variables dealing with the Macroeconomics. CO1:

- Understand the basics of closed and open economy models. CO2:
- Understand issues and concerns of the economy such as unemployment and inflation. CO3:
- Understand the concept and function of Money and Determination of Money supply and CO4: demand.

| Unit | Topics to be covered   | No. of Lectures |
|------|--|-----------------|
| 1    | The Closed Economy in the Short Run<br>Classical Macroeconomics: Money, prices and interest, Keynesian system:<br>money, interest and income, IS-LM model, policy effects, Analysis of Business<br>cycle: phases of business cycle, theories of business cycle: Hawtrey, Keynes,<br>Samuelson, and Hicks.  | 20              |
| 2    | <b>Inflation, Unemployment and Expectations</b><br>Inflation its types and causes; cost of inflation, the Fisher effect,<br>unemployment: concept, types, measurement and effect on different sections of<br>society, Philips curve, Adaptive and Rational expectation hypothesis, policy<br>implications. | 20              |
| 3    | Open Economy Models<br>Short-run open economy models; Mundell-Fleming Model; exchange rate<br>determination; Purchasing Power Parity; Asset market approach;<br>Dornbusch's Overshooting Model; monetary approach to balance ofpayments;<br>international financial markets.                               | 20              |
|      | TOTAL  | 60              |

Suggested Readings:

Dornbusch, Fischer and Startz, Macroeconomics, McGraw Hill, 11th edition, 2010.

N. Gregory Mankiw. Macroeconomics, Worth Publishers, 7th edition, 2010.

## **SEMESTER - IV MJC - 7: INDIAN ECONOMY** (Credit - 5)

### **Course Outcomes**

After the completion of the course, the student will be able to:

CO1: Examine sector-specific policies and their impact in shaping trends in key economic indicators in India. CO2: Evaluate the Indian Empirical evidence

CO3: Analyze the rapid Economic changes taking place in the economy

CO4: Learn about the role of agriculture and industry in Economic development and their performancein Indian perspective.

| Unit | Topics to be covered   | No. of<br>Lectures |
|------|--|--------------------|
|      | Economic Development since Independence<br>Characteristics of Indian Economy, Main features of the economy at independence;<br>Structural change, growth and developmentunder different policy regimes—goals,<br>constraints, institutions and policyframework; an assessment of sectoral<br>performance, sustainability and regional contrasts; structural change, trends of<br>savings and investment.                                     | 10                 |
| 2    | Indian Agriculture:<br>Importance of Agriculture in Indian economy, Problems in Indian Agriculture and<br>their possible solutions, Efforts by the Government for upliftment of Indian<br>Agriculture, Trends in Agricultural growth and Productivity; Land Reforms; Green<br>and Rainbow Revolution; Agricultural Marketing; Agricultural Price Policy; Food<br>Security in India, status, prospect and problem of food processing in India | 15                 |
| 3    | Indian Industry and Services Sector<br>Industrial policies in India since independence, Importance of small scale<br>industries in India, problems, remedies, industrial sickness in India, labour issues<br>and social security, Services Sector: growth and present state of IT, hospitality and<br>financial sector inIndia, Fiscal and Financial Sector Reforms in India. Foreign<br>Trade in India - Composition and Direction.         | 15                 |
| 4    | <b>Bihar Economy:</b><br>General features of the economy, performance, major challenges and causes of backwardness in different sectors. Human ResourceDevelopment- Concept and Emerging Issues, Polices for unemployment, Migration- Dimension and its impact. Policies and Programmes of the State Government for development of different sectors.  | 20                 |
| _    | TOTAL  | 60                 |

Suggested Readings:

# **SEMESTER - V MJC 8: INTERMEDIATE MICROECONOMICS 2** (Credit - 5)

### **Course Outcomes**

After the completion of the course, the student will be able to:

- Differentiate between Partial and General Equilibrium CO1:
- Analyse the behavior patterns of different economic agents and market situations CO2:
- Understand Imperfect Competition and Distribution theory CO3:
- Learn about Externalities and Market Failure CO4:

| Unit | Topics to be covered   | No. of Lectures |
|------|--|-----------------|
| 1    | Imperfect Markets<br>Imperfect markets :common features, price and outputdetermination in<br>monopolistic competition, concept of excess capacity, non price competition:<br>selling cost and advertising, cost plus(mark up )pricing theory, various approaches<br>to price and output determination under Oligopoly-classical models of oligopoly:<br>duopoly Cournot model, collusive oligopoly: cartel and price leadership, basic<br>idea of kinked demand curve.   | 20              |
| 2    | <b>Distribution Theory (Pricing of Factors)</b><br>Concepts of factor productivity, Marginal Revenue Product (MRP) and Value of<br>Marginal Product (VMP), pricing of factors in perfect and imperfect market,<br>Marginal productivity theory of distribution, Euler's theorem and product<br>exhaustion problem, technological progress and factorshares in income, some<br>major theories of distribution: Ricardian theory of rent, modern concept of rent,<br>quasi rent, Classical andKeynesian theory of interest, Innovation theory of profit,<br>Knight's theory of profit. | 10              |
| 3    | Market Failure<br>Concept and causes of market failure, correction of market failure, market failure<br>and market imperfections, market failure vs. government failure, Externalities in<br>production and consumption, Coase Theorem, public goods, semipublic goods,<br>private goods, merit and demerit goods, markets with asymmetric information.  | 15              |
| 4    | General Equilibrium, Efficiency and Welfare<br>Concept of Partial and General Equilibrium, Welfare concept, Walrasian General<br>Equilibrium, concept and conditions of Pareto Optimality, perfect competition and<br>Pareto Optimality, perfect market asefficient market: existence and stability of<br>equilibrium under perfect competition,   | 15              |
| _    | TOTAL  | 60              |

# SEMESTER - V MJC – 9: PUBLIC FINANCE (Credit - 5)

Course Outcomes

After the completion of the course, the student will be able to:

CO1: Understand the importance of Public finance

CO2: To understand the implications of fiscal policy

CO3: To analyse the trends and composition of public expenditure in India

CO 4: To understand the importance of Fiscal Federalism

| Unit | Topics to be covered   | No. of<br>Lectures |
|------|--|--------------------|
| 1.   | Introduction to Public Finance<br>Public Finance: Meaning, Nature, Scope and Importance; difference between<br>Private and Public Finance; Principle of Maximum Social Advantage; Role of<br>State in Public Finance. Fiscal functions of State: Allocation, Distribution,<br>Economic Growth and Stabilisation. | 20                 |
| 2.   | Sources of Revenue<br>Taxes, loans, grants and aid – meaning and types, canons/ principles of taxation,<br>problem of justice in taxes, incidence of taxation, taxable capacity; Impact of<br>taxation & tax evasion characteristics of Indian tax system, defects & steps of<br>reform.                         | 14                 |
| 3.   | Public Expenditure and DebtPrinciple of Public Expenditure; Principle of Public Debt and its Methods ofRedemption; Effects of Public Expenditure on Production and Distribution;Public Debt in India.  | 14                 |
| 4.   | Public Finance in India<br>Sources of Revenue of Central Government ,State Government and Local<br>Bodies; Concept and Types of Budget, Fiscal Deficit, Deficit Financing and<br>Deficit Budget, Financial relation between Central and State; Finance<br>commission; Fiscal Policy.                             | 12                 |
| -    | TOTAL  | 60                 |

## Suggested Readings:

# **SEMESTER - VI MJC - 10: INTERNATIONAL ECONOMICS** (Credits - 4)

#### Course Outcomes

After the completion of the course, the student will be able to:

- Analyze the issues related to BoP, exchange rates and direction of trade. CO1:
- Describe micro-foundations of the various aggregates of International Economics CO2:
- Explain different International trade theories CO3:
- Learn about different International Institutions and their relevance for Indian Economy. CO4:

| Unit | Topics to be covered  | No. of<br>Lectures |
|------|---|--------------------|
| 1    | <b>Introduction:</b><br>Nature and scope of International Economics, trade surpluses and deficits, the economic basis of trade, terms of trade, Gains from trade, Instruments of trade policy and their impact on international trade, trade barriers (quantitative and qualitative): tariffs, subsidies and quotas, free trade vs. protection: case for free trade, case for protection.   | 15                 |
| 2    | <b>Theories of International Trade:</b><br>Absolute and Comparative advantage, Opportunity cost theory, Ricardian and<br>Heckscher-Ohlin Model, Leontief's Paradox, Immiserising Growth and the<br>Transfer Problem.  | 10                 |
| 3    | Exchange rate and BoP:<br>Concept and types of Exchange rate, Theories of Exchange rate determination,<br>fixed vs. flexible exchange rate, factors affecting exchange rate, impact of<br>exchange rate on economy, market for foreign exchange, Review of Balance of<br>Payment (BoP) accounting, components of BoP: current and capital account,<br>Disequilibrium of BoP: causes and methods of correction, Adjustment<br>mechanisms, Internal and external balance, Elasticity, Absorption and Monetary<br>Approach to BoP. | 18                 |
| 4    | International Institutions:<br>WTO, IMF, World Bank, ADB, New Development Bank: Objectives, principles<br>and functions.  | 7                  |
|      | TOTAL   | 50                 |

Suggested Readings:

# **SEMESTER - VI** MJC - 11: Contemporary Issues in Indian Economy (Credits - 5)

#### Course Outcomes

After the completion of the course, the student will be able to:

CO1: Demonstrate the Paradigm shift in policy and economic indicators in the post independent India

CO2: Analyse the rapid changes taking place in India in terms of plan period, human development, Education and Health CO3: Grasp the Concept of poverty and unemployment in Indian perspective

CO4: Analyse the composition volume and direction of foreign trade

| Unit | Topics to be covered   | No. of<br>Lectures |
|------|--|--------------------|
| 1    | <b>Dimensions of Economic Development:</b><br>Growth distribution and structural change with respect to gender and regional contrast MDG, SDG, Sustainable development, Inclusive growth and Financial Inclusion Capital formation and technological development.  | 20                 |
| 2    | Issues in Indian Economic Policy:<br>Human resource development: Education and Health.<br>Population growth and Economic development, Demographic trends and issues,<br>Demographic dividend;<br>Unemployment, Poverty and Inequality.<br>Macroeconomic stabilization: Trade, Fiscal and Monetary policy<br>Infrastructure development in India<br>Environmental issues in India | 25                 |
| 3    | India's Foreign Trade:<br>Volume and Trend of Foreign Trade in India, EXIM Policy assessment, India's balance<br>of payment, Globalisation and its impact on Indian Economy, WTO and India.  | 15                 |
|      | TOTAL  | 60                 |

# **SEMESTER - VI MJC -12: DEVELOPMENT ECONOMICS** (Credit-5)

## Course Outcomes

After the completion of the course, the student will be able to:

- Understand the different concepts of development and evaluate the gross national growth CO1: experience.
- Analyze the connection between growth and inequality and identify the role of state in economic CO2: development
- Learn about the concept of poverty and its measurement and the connection between inequality and CO3: poverty
- Understand development in global perspective. CO4:

| Unit | Topics to be covered  | No. of<br>Lectures |
|------|---|--------------------|
| 1    | <b>Growth and Development:</b><br>Concept of Economic Growth, Economic Development, Economic Progress and<br>Economic Welfare, Measurement of Economic Growth, Factors of Growth<br>Historical experience of development (Stages of Growth; late industrialization;<br>structural analysis),Poverty and inequality (conceptual issues and<br>measurement; capabilities and entitlements, policies for poverty reduction)<br>State and the market (market failure; government failure; conflict versus<br>complementarity)                               | 20                 |
| 2    | Determinants of Development<br>Capital and technical progress (role of capital, capital output ratio; resource<br>allocation; level and pattern of capital formation; pattern of technical progress;<br>technology and unemployment; obsolescence, choice of techniques) Labour and<br>employment issue (population growth; demographic transition; human resource<br>development, surplus labour, open and disguised unemployment, informal sector;<br>rural-urban migration).<br>The Environment and Sustainable development; Non-Renewable resources | 20                 |

# SEMESTER - VII **MJC -13: ADVANCED QUANTITATIVE METHODS** (Credit - 5)

## Course Outcomes

After the completion of the course, the student will be able to:

- Develop analytical and organizational skills. CO1:
- Use mathematical techniques to analyze the economic problems and their effects. CO2:
- Use Differential and Different Equations in Economics. CO3:
- Use multi-Variable Optimization. CO4:

| Unit | Topics to be covered  | No. of<br>Lectures |
|------|---|--------------------|
| 1.   | Integration:<br>Concept and Methods of Integration – Integration by Substitution, Integration by<br>Transformation & Integration by Parts; Application of Integration in Economics.   | 10                 |
| 2    | <ul> <li>Functions of Several real Variables:</li> <li>a. Technique of Partial Differentiation; Second Order Partial Derivatives; Cross Partial Derivatives; Applications of Partial Derivatives in Demand, Utility and Production Analysis.</li> <li>b. Technique of Total Differentials; Second order Total Differentials; Derivatives of Implicit Functions</li> </ul>   | 6                  |
| 3    | <ul> <li>Multi-Variable Optimization:</li> <li>a. Maxima and Minima of a Function of two or more than two Variables – Hessian Determinants.</li> <li>b. Unconstrained Optimization and Constrained Optimization with EqualityConstraints – Use of Lagrange Multiplier.</li> <li>c. Applications of Unconstrained and Constrained Optimization in Economics – Equilibrium of Firm under Pure Competition.</li> </ul> | 8                  |
| 4    | Linear Algebra:<br>Basic Concepts of Vector, Types of Vector, Addition of Vectors, ScalarProduct of Two<br>Vectors.<br>Matrix and Determinants: Types of Matrices, Addition and Subtraction of Matrices,<br>Multiplication of two Matrices, Transpose and Inverse of a Matrix, Rank of a matrix,<br>Determinant and its Properties, Solution of Simultaneous Equation Models.                                       | 8                  |
| 5    | Linear Programming, Input Output Model and Game Theory-<br>Introduction to linear programming, formulation of linear programming problem, concept<br>of duality, solution of linear programming trough graphical method.<br>Input-output analysis- meaning and basic concept<br>Game theory- concepts, strategies- dominant strategy, saddle point, zero-sum game.  | 16                 |
| 6.   | Correlation, Regression and Time Series Analysis<br>a. Partial and Multiple Correlation<br>b. Partial and Multiple Regression<br>c. Time Series Analysis: Components of Time Series and Measurement of Trends   | 12                 |
|      | Total   | 60                 |

# SEMESTER - VIII MIC - 10: INTERNATIONAL ECONOMICS (Credits - 4)

#### Course Outcomes

After the completion of the course, the student will be able to:

- CO1: Analyze the issues related to BoP, exchange rates and direction of trade.
- CO2: Describe micro-foundations of the various aggregates of International Economics
- CO3: Explain different International trade theories
- CO4: Learn about different International Institutions and their relevance for Indian Economy.

| Unit | Topics to be covered   | No. of<br>Lectures |
